

● advance-ml-fama

Study materials for the AI / ML course

students branch

🚀 First step — get the student branch

Students clone the course repository before opening notebooks.

```
$ git clone -b students
https://github.com/MajedTuah/advance-ml-fama.git

$ cd advance-ml-fama

# Already cloned?

$ git fetch origin students && git checkout students
```

Quickstart

01 Create environment

```
python -m venv .venv
```

02 Install packages

```
pip install -r
requirements.txt
```

03 Launch Jupyter

```
jupyter lab
```

📁 Repository map
